May 26, 2010

It's sandal time ladies! Make your feet summer ready with Kerasal's One Step Exfoliating Moisturizer! This foot ointment is ideal if your looking to eliminate any dryness on your feet.

The nation's #1 selling ointment for softening feet and controlling calluses build up, Kerasal's Moisturizing Foot Ointment is guaranteed to repair and soften even the toughest, dry feet, cracked heels and calluses when used as directed.

This moisturizing ointment works VERY well and VERY quickly. It's an ointment so it has a thick gel-like consistency. I would recommend using it at night and putting on socks after application so that it has time to really sink into your feet. They come in 2 sizes a 15g (\$6) and 30g (\$10) and can be purchased at various drugstores or at [ULTA](#). Go to www.kerasal.com for more information

Overall rating: 4 out of 5
