**How many of you have dealt with dry and cracked heels or know someone who has?**

## About [Kerasal](#)

[Kerasal](#) is clinically proven to provide greater efficacy and repair even the worst dry and cracked feet. [Kerasal](#) Exfoliates and moisturizes in one step and was voted #1 Pharmacy recommended over the counter foot care brand by Pharmacy Today in February 2006.

## My Thoughts

Something I have been ashamed to say since high school is that I have cracked heels. I was not able to wear the cute sandals and such as the other girls did. I was embarrassed and mortified about my feet. I love my daddy but this was a trait that he gave me and I wish he would take it back! I have tried MANY lotions and such throughout the years to try to find something that would make my heels nice and soft. It is not easy to find something that works really well.

When the [Kerasal](#) arrived it could not have showed up at a better time. My heels were deeply cracked and very painful to walk on. I quickly opened up the tube and covered my heels in the cream. I also then placed the socks that came with the Kerasal over my feet. I only used [Kerasal](#) for 2 days before I noticed a big difference. My heels were not painful to walk on any longer. Now that I have used it for two weeks my cracks are gone and I can finally feel comfortable wearing sandals this summer!

## Buy It!

You can Purchase Kerasal is sold at many drug stores and supermarkets around the nation. You can go [HERE](#) to find a store near you.
